Exciting Innovations For
A Beautiful Tomorrow!

WELCOME TO THE WORLD OF SPLICE GROUP

The march towards realizing the creation of a large business conglomerate begins with a great dream. A dream that dares to make a difference and stand out to create its cult following. Decades back, SPLICE Group took a leap to realize dreams on a bigger scale.

The company's inception with Himalay Ply happened in 1957 with the name of Himalay Timber in Gorakhpur. Within a short span, brand Himalay Ply garnered popularity across entire Purvanchal as the Leading Timber Supplier of Eastern Uttar Pradesh. As years passed by, the group grew in stature and became a name to reckon with in the plywood market.

In 2002 we expanded our portfolio and became the Largest Supplier of Plywood in Gorakhpur and nearby areas. We further added multiple brands of plywood, mica and hardware in our catalogue. Add to this momentous march, Himalay Ply with the store area of 30,000 sq.ft. took pride as the largest showroom of plywood in Gorakhpur and nearby areas. The brand that started from Himalay Timber transformed into Himalay Ply which transformed to a strong symbol of trust for Timber, Mica & Plywood in Gorakhpur & nearby Districts.

Drawing upon its years of experience and excellence, Splice emerged as a flagship brand of M/S Ehsan Agro Wood Products Pvt. Ltd. with its state-of-the-art set up at GIDA, Gorakhpur (U.P.) India. Reiterating the essence of genuineness and quality products, Splice offers a range of offerings that stands tall with its durability, strength, features and reasonable prices. Today, Splice has garnered fame and acceptability across markets and cemented its place amongst the connoisseurs of plywood and plywood products.

GRV Salvex
Complete and robust Furniture solutions for today's living. A spread of finely crafted furniture to rev up every corner of your home.

Putting in all the valuable years of experience and expertise in bringing out the best of capabilities, the professionals at work in Splice have come forward with world-class offerings in Designer Door, Plywood and Laminate. With every product standing tall for durability, strength, features and reasonable prices – a testament of Splice's commitment for excellence at every step.

Differentiating between a ply and Splice Ply won't be too much of a task. Thanks to these differentiating factors to guide you further.

FROM THE CHAIRMAN'S DESK

With the ever changing dynamics of business landscapes and living the new normal in these challenging times, it's all in the mindset and the holistic urge within that can make a change.

Over the years, Splice Group has been firm with its gradual focus on strong expertise and vision of providing high quality solutions to our clients, by scaling roads to excellence every hour, every day! The thrust on high class innovative techniques for manufacturing Plywood, Boards and Doors and the will to be different from the rest has elevated us to an envious position in the market today.

It has been possible due to our dream team of innovators, ideators and professionals with high expertise that have tirelessly translated every thought into success stories. Needless to say, a thank you will never be enough for them.

Looking ahead, we are eagerly looking forward to work together and stronger to create great quality and ensure to provide maximum value to clients that ensure complete customer satisfaction. We are sure the future holds immense possibilities as we are all geared up to achieve the impossible.

Ahsan Karim Khan
Chairman

FROM THE MANAGING DIRECTOR'S DESK

With changing social and lifestyle changes, the need for holistic solutions is the need of the hour.

Our motto since our inception has been to create industry ready solutions backed by sound work ethics and values. Today we are recognized among the best designer door, laminate and plywood providers and one of the credible entities in North India. We believe in holistic growth of our products and solutions, hence with the same motive we provide quality solutions with the perseverant efforts of our dedicated team. We conduct our business in a way that supports our customers, our vendors, our partners and our employees. We work together and we win together, creating competitive advantage as one team.

With a firm focus on the future roadmap for Splice, our team is enthusiastically eager to take on new challenges and turn them into opportunities. The idea is to innovate with the changing times and deliver the best, always to our customers.

Faizan Ahmad
Managing Director

Research and Development Prowess

Splice group's Research and Development Division has earned recognition and rave reviews all thanks to its conditioning and testing facilities for product / process development, evaluation, rigid quality control and new technology analysis. The testing equipment available at our facility consists of the standard machines for conducting physical, mechanical and tests of all kinds.

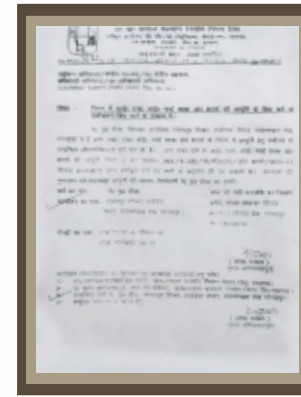

They include testing for extreme weather conditions, temperatures and breakages etc. The facility also boasts of various machinery for accurate analysis and assay of raw materials and finished products. The R&D Division, besides keeping pace with technological advances in the field of wood technology, assists in the diversification programmes & development of new products.

Our R&D specialists have developed various grades of plywood developed through wholly independent research with each of these products promising great usage across various applications. These panels combine the economy and eco-friendliness of hardboard along with the utility and durability of specialized plywood panels.

QUALITY & CERTIFICATIONS

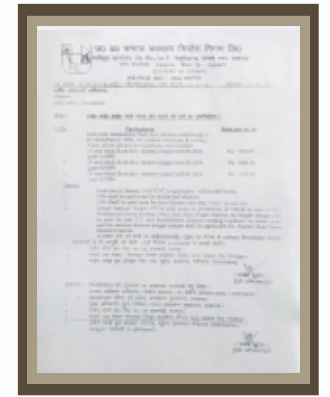

As a recognized 9001:2000 certified company, its flawless quality management system ensures that stringent quality tests deployed by the company lead to manufacturing complying with industrial standards. What's more, there is structured monitoring of the manufacturing process with the workforce guided to craft exceptional products. On top of it, each of the products gets periodically tested in lab which is equipped with top-of-the-line line testing instrument to check conformity with the ISI specification regarding quality control and output.

PLYWOOD

Plywood (BWR & MR Grade) IS : 303 / IS : 710

Veneers from high quality logs are mechanically dried and they undergo stress relieving process, which are assembled in such a way to form a balanced construction. High quality fortified synthetic resins are used for gluing the veneers. Glue line is poisoned by special formulations of chemicals to make Splice Plywood safe against borers. It is hot pressed under proper temperature and more than 16 Kg/cm² specific pressure. Conditioning is done after pressing, followed by preservative treatment.

Applications : Partition and paneling, ceilings in public rooms and corridors, floor underlayment, computer rooms, furniture, bus bodies, railway coaches, milk booths, sign boards, insert in panel doors, storage racks.

COMING SOON

FIRE RETARDANT PLYWOOD

PLYWOOD (BWR & MR GRADE) IS : 5509 : 2021

Splice offer a range of best in class fire rated (FR) plywood, board and panels, designed and specified to reduce the spread of flames and limit the contribution to the growth rate of a developing fire.

Fire damage in buildings can be devastating and as a result FR products are increasingly being specified in a wide range of end uses, to help suppress the spread of fire, allow safe evacuation and reduction of financial loss.

Applications

Popular applications include wall linings, partitions and ceilings in hotel foyers, offices, public libraries, schools, hospitals and shopfitting. FR products are also used extensively within the trade exhibition sector.

Product range

When specifying high-performance FR products, we offer a good range of certified and independently tested options, all available from stock nationwide.

NANO TECHNOLOGY FOR BETTER FIRE RESISTANCE

VERY LOW FLAMABILITY

FIRE RETARDANT LESS MOISTURE ABSORBMENT

FLEXI PLY

Flexi ply is a form of plywood which is extremely flexible. It doesn't show any resistance to bending or rolling and can be twisted or curved into any shape without chipping, cracking, or peeling, which is not possible with regular forms of plywood as they tend to break upon bending or twisting. Flexi ply with maximum flexibility can be easily flexed or bent by hand and the bending radius will vary according to the thickness of the sheet. Flexi ply's unique trait is it lends itself to almost any curved contour without losing out on its strength and stability.

Splice Flexi-Ply advantages

- Can get a smooth and seamless edge and also a single sheet look and feel.
- It allows one to give shape to new furniture concepts without intensive efforts, thus resulting in a wide range of creations in the furniture world.
- Because of its flexibility and easy working properties, the work of the carpenter gets easy and quick, which is otherwise difficult, and time-consuming.
- It can stand well against everyday wears and tears and moderate scratches.

BLOCK BOARD

BLOCK BOARD (BWR & MR Grade) IS : 1659

These are made out of excellent quality of Plantation Timbers. Logs are quarter sawn into Planks using SDR method, which are chemically treated and well seasoned before converting into battens in a multiple rip saw. Battens are sandwiched between glued mechanically dried veneers and are pressed in hot press under accurate temperature and pressure. Quarter, sawing of logs and proper seasoning of planks make it dimensionally stable and treatment of planks, poisoning of glue line and preservative treatment of finished block board make Splice durable and safe against borers.

Applications : Partition and paneling, ceilings in public rooms and corridors, floor underlayment, computer rooms, furniture, bus bodies, railway coaches, milk booths, sign boards, insert in panel doors, storage racks.

WPC (WOOD POLYMER COMPOSITE)

PLYWOOD (BWR & MR GRADE) IS : 5509 : 2021

Splice's WPC (Wood Plastic Composite) are green materials that have high potential in bringing about sustainability. They don't contain excessive chemicals that may pose toxic for the environment and are durable in nature. Plant-based fibers are mainly used in reinforced plastics, instead of fibrous materials as they are cost effective, robust, highly stiff, and versatile. Such fibers also emit less carbon dioxide, have low density, and possess biodegradability properties.

FIRE RETARDANT DOORS

Splice Fire Retardant doors are designed to protect property and life in the event of a fire. For this, the door must serve as a fire and smoke barrier.

Fire Doors must serve four main functions

- Serve as a regular door at all times and provide ready exit from a fire area during a fire
- Inhibit spreading of fire
- Protect life and property by reducing smoke hazards providing strength, durability, and maximum fire resistance
- Fire doors have today evolved to accommodate the growing electrified functions a door must support.

Applications

These doors can be used in high-rise buildings, metro railway stations, telecom centers, power plants, cellular network stations, garment processing units, shopping malls, industrial plants, multiplexes, hotels, auditoriums, software parks, restaurants, etc. Splice fire retardant doors are designed to perform and in the most demanding environment.

Features

- High aesthetics and robust structure
- Fully flush constructions
- Easy to install on a flush wall opening & dry wall partitions
- Factory finished for primer and paint finishes.
- Wood Grain can be provided as an optional finish.

MODULAR FURNITURE

Every aspect of the GRV Solvent modular furniture ranges has been designed with the environment considered, from ethical material choice and production efficacy to storage efficiency and ease of disassembly. With a firm compact dimensions, GRV modular furniture is perfect for modern commercial environments where the product must look after itself and space is a premium.

NATURAL VENEER

Recognised for its versatility, expressed in the innovative way it can be transformed, Splice natural wood veneer is a timeless trend in the world of architecture and interior design. Unique in appearance, texture and grain configuration, Natural wood veneered doors present an opportunity to explore new perspectives for projects that are intended to be creative and distinctive.

A COMMITMENT FOR SUSTAINABILITY

More than an entity that has carved a niche following with world class products and offerings, we are also forging ahead as a responsible organization concerned about the good for our mother nature. At Splice Group, we care a lot about our environment.

An approach which is evident in our circular approach on wood and also various recognitions through environment certifications. It's a continuous journey towards product excellence that keeps environmental care at the heart of every action.

RECOGNITION AND AWARDS

Our penchant for excellence has earned us a world of acclaim and recognition. Since its inception, Splice has gone from strength to strength in cementing its stature as a brand of repute. Over the years, we have not just created excellent products, we have also carved a niche for the brand.

Mr. Ahsan Kareem Khan

Chairman – Splice Group, receiving an award from honorable Union Minister of Micro, Small and Medium Enterprises (MSME), Mr Narayan Rane. It's a very proud moment for the whole Splice Ply family.
